

Influenza-Like Illness Report

Mississippi State Department of Health

Week 37, 2010

For week 37 (09/12/10-09/18/10), the overall state ILI rate (2.3%) decreased slightly from last week (3.2%) and was lower than this time last year (13.1%)*.

During week 37, most districts had a decrease in ILI activity, except for two districts (1 and 6) which remained about the same.

*Please note during August 2009, the state ILI rate began increasing due to the 2009 H1N1 pandemic.
